

Intelligence Risk Report

Deep & Dark Web Exposure Intelligence Report

SUMMARY

During the 365-day monitoring period from September 25 through September 24, 2026, Overwatch identified 5,854 unique, fully exposed payment card numbers circulating across criminal marketplaces linked to your BINs. Overwatch also identified an additional 4,580 cards actively listed for sale where the PANs were hidden/masked. Using proprietary intelligence methods, Overwatch can unmask 1,422 of these PANs, enabling further analysis and investigation. These findings were deduplicated against prior detections to confirm they were newly observed. Overwatch also detected 18 employee credentials, 180 customer credential pairs, and related threat actor chatter, compromised accounts, and tools, tactics, and techniques targeting your institution.

UNCOVERING COMPROMISED PANS— PAST 365 DAYS

\$568.8K

Estimated Fraud
Prevented From
Card Unmasking

+

\$210K

Estimated Fraud
Prevented From
Exploited PANS

* Estimates are based on an average of \$400 per exposed PAN.

Through Overwatch's proprietary methodology, we are able to uncover details about compromised PANS belonging to you that are actively listed for sale in the criminal underground (unmasked). This helps us identify the exact account and prevent fraud before the attacker weaponizes the PAN.
